2009**Summary:**

Of the AP courses offered at TRHS, Timberlane students had a higher passing rate of 3 or better than the national average in 7 of 10 classes. The % of TRHS students attaining a 4 or better score beat the national average in 6 of 10 classes. The % of TRHS students attaining a 5 beat the national average in 2 out of 10 classes. Our AP Computer Science, Calculus and US History classes are a clear step above, while AP Chemistry clearly needs work.

2010**Summary:**

Of the AP tests offered at TRHS, Timberlane students had an equal to or higher passing rate of 3 or better than the national average in 8 of 13 classes. Note that 8 tests given at TRHS had less than 10 students (4 had 3 students or less), so the statistics are very granular for some... The % of TRHS students attaining a 4 or better score beat the national average in 5 of 13 classes. The % of TRHS students attaining a 5 beat the national average in 5 out of 13 classes. Again, bear in mind that several TRHS tests had 3 or fewer students taking them, and in 2 of these TRHS students did quite well. TRHS AP Computer Science, Calculus, English Lit and US History classes are a clear step above. AP Biology, Statistics and Chemistry clearly need significant work, with but 3 students taking the Biology test and all of them scoring 1 and Chemistry showing approximately half the passing rate as the national average. AP Physics has also seen a trend to lower scores that should be examined.
